<http://a1ly.com/html/942.html>

Base Pump water powered sump pump - Basepump is an extremely reliable, very powerful, water powered backup sump pump system. With no battery to wear out or maintain, no charger to plug in or monitor, it is designed as an automatic, independent system from the primary sump pump. Basepump is essentially in a class by itself. Uniquely mounted on the ceiling above the sump pit, it doesn't have to fight the downward force of the water that most pumps must push up vertically. For this reason, it consistently removes more water per hour than other water powered backup sump pumps and even rivals the best battery powered backup sump pumps, short- and long- term. Will pump 750 GPH at 50lb, 10 ft rise. - Price: \$290.00 - Code: RB750
<http://a1ly.com/html/941.html>

Escutcheon Tube American Standard Heritage - 75030-02 1-5/16 w x 1-1/8 long - Price: \$9.95 - Code: 10232

Qwik Jon - Qwik Jon System by Zoeller Co. This is a polyethylene pedestal (41" x 25" x 5 1/2") that either sits on the floor or recessed to be level with the floor. The toilet is to be mounted to the top of the pedestal. There is a .4hp sewage ejector pump (with non-clogging vortex impellers) inside the unit. It uses a 2" discharge line (passes up to 2" spherical solids) with a check valve going up from behind where the toilet sits. It will accommodate a toilet, lav sink, a bathtub, and/or a laundry sink. You can install a variety of toilets on it (toilet not included). The pump is rated at 60 GPM at 10' head, and it can lift effluent 15 feet. This great Zoeller sewage ejector system (model 100 PSF) uses standard 115 voltage (3 prong neoprene wire), can have up to a 130F (54C) temp. and has a UL listed pump. Comes in one carton. - Price: \$675.95 - Code: QJ1

Water Meter - AMCO is the world's leading supplier to the water industry. In addition to producing over 8 million water meters each year, AMCO Water Metering Systems new name for former ABB Water Meters. The easiest way to measure water consumption. Take the guesswork and tedium out of filling and topping off reservoirs with these easy to use water meters. Simply attach one end to water source and other end to a hose or valve and these super accurate meters will tell you exactly how much water you are dispensing in 1/8 of a gallon increments. Makes topping off reservoirs easy because now you can add water and know exactly how much nutrient concentrate to add. The single-jet meter, non-remote, operates on the velocity principle where a jet of water enters the measuring chamber and drives the rotor. The velocity of the rotor is proportional to the flow. The meter has a vacuum sealed dry register resistant against dust and condensation. AMCO ABB metering systems specifically designed for the requirements of utility, submetering or industrial applications in North America. For Canada and the United States, all utility meters meet or exceed the relevant specifications of the American Water Works Association (AWWA). Perfect for residential or camp ground private metering, technologically advanced solution for multi-unit submetering. Ten year manufacturer's guarantee. Features; Bronze Cast Case Positive displacement mechanism Magnetically driven 3" direct register Max pressure 150 PSI Max temp 120 deg. F 5/8" MPT inlet and outlet, with reducers 1/4 GPM minimum flow for accuracy odometer style counter tracks total consumption - Price: \$69.95 - Code: AMCO1

<http://a1ly.com/html/2867.html>

Clear Mirror Original 20" x 20" - The Original ClearMirror® is an electrical bathroom mirror defogger. Simply speaking, a ClearMirror® is a very thin heater that is adhered to the back of a mirror and wired to the same power supply as the bathroom light fixture, fan or separate switch. When turned on the pad heats up, preventing condensation on the surface of the mirror. The size of the ClearMirror® determines the area of the mirror that will remain dry and fog free. Depending upon humidity and time, the heat will radiate and may clear a larger area. - Price: \$109.95 - Code: CM20

<http://a1ly.com/html/2866.html>

Clear Mirror Original 14" x 14" - The Original ClearMirror® is an electrical bathroom mirror defogger. Simply speaking, a ClearMirror® is a very thin heater that is adhered to the back of a mirror and wired to the same power supply as the bathroom light fixture, fan or separate switch. When turned on the pad heats up, preventing condensation on the surface of the mirror. The size of the ClearMirror® determines the area of the mirror that will remain dry and fog free. Depending upon humidity and time, the heat will radiate and may clear a larger area. - Price: \$99.95 - Code: CM14

<http://a1ly.com/html/2865.html>

Big Bloom 39" - The Big BLOOM! measures 39" high with a diameter at the top of 41" and weighs 66 lbs. The plastic is white and the LEDs are colored allowing the customer to have the lights revolving from color to color or to set the control switch to one color. There are 12 interior rotating colored LEDs producing 7 colors including red, cyan, yellow, green, blue, magenta and white. You have a choice of 3 settings: standard rotational, slow rotational and one color. The Big BLOOM! offers low voltage and can be interfaced with existing outdoor lighting systems so the cords can be spliced together and buried. They are CSAus approved to be interior or exterior décor and can be left outside year-round. This model also offers a drainage hole. - Price: \$895.95 - Code: bloom3

SaniPlus-Round Front White Toilet - Includes round white toilet bowl, toilet tank & macerating unit Does NOT include toilet seat Pump Dimensions: H12" x W21" x D9" Motor: Induction Motor (no carbon brushes or gears), tested over 30,000 cycles. 3600 rpm. Electrical supply: 110-115V; 60Hz; 4.65amps Discharge: Horizontally to 150 ft, Pumps vertically to 12 ft Gravity Fall on Horizontal installations: 1/4" per ft Discharge Pipe Diameter: 3/4" Construction Materials: Polypropylene, C.R.P., stainless steel, Neoprene Max. temp. 104°F Normal Running Time: 10-20 secs subject to installation pipe run Water per Flush: 1.6 US gal, Volume 7.35 gal/m Designed to function with Toilet & Hand-basin &, Shower or Bathtub. Accessory: Extension kit Model# Exten-4000 allows hiding macerator behind wall. The Saniplus is a system that is used to install a complete bathroom up to 12 feet below the sewer line, or even up to 150 feet away from a soil stack. Installation is simple, there are just four connections. The macerating/pump is connected to the spigot of a horizontal outlet toilet. The toilet tank is connected to the water supply. The macerating/pump is connected to the small diameter discharge pipe work. The macerating/pump is connected to the electrical supply. In addition to the toilet waste, Saniplus will also discharge gray wastewater from a variety of other sanitary fixtures, such as: a hand basin, a bath, a bidet or a urinal. When adding a bathtub or shower a raised base will have to be constructed to allow for the installation of a P-trap and some gravity flow towards the pump unit. - Price: \$859.95 - Code: SPR

SaniCompact-Elite - * Includes toilet bowl that incorporates the macerating unit and toilet seat * Toilet Dimensions: H19 1/2" x W14 1/2" x D22" * Motor: Induction Motor (no carbon brushes or gears), tested over 30,000 cycles. 3600 rpm. * Electrical supply: 110-115V; 60Hz; 7.2amps * Discharge: Horizontally to 100 ft, Pumps vertically to 9 ft * Gravity Fall on Horizontal installations: 1/4" per ft * Discharge Pipe Diameter: 1" * Construction Materials: Polypropylene, C.R.P., stainless steel, Neoprene * Max. temp. 95°F * Normal Running Time: 10-20 secs subject to installation pipe run * Water per Flush: 1.3 US gal, Volume 4.08 gal/m * Designed to function with Hand-basin. * This modern shaped self-contained china toilet is especially designed with several ideas in mind; for situations where there is not enough space, as a toilet that uses a minimum amount of water and as a toilet for use with people that have physical limitations. The flushing mechanism is electrically timed to allow approximately 3.5 liters (1.3 USG) of water to pass through the toilet. * In addition to the toilet waste, SaniCompact-Elite will also discharge gray wastewater from a hand basin. * The SaniCompact-Elite has no external water tank as the flushing mechanism is built in and is totally electric. After use, one presses a pneumatic button on top of the bowl, this activates a timer and a solenoid valve in order to fill and wash the sides of the bowl. The motor starts and the waste and paper are sucked inside, where it is macerated and pumped away. The motor stops after approximately 15 seconds and the timer programs the refill of the bowl with fresh water. * The discharge pipe of the SaniCompact-Elite is 1 inch in diameter, the pump operates at 7 PSI and pumps the effluent upwards to 9 feet and/or 100 feet horizontally. The discharge pipe-work may be made with either copper or solvent welded plastic material, provided that a consistent gravity fall is maintained throughout the run. * At the soil-stack end of the pipe run the small-bore pipe-work must be connected to the waste by means of an appropriate TY fitting. Electrical supply to the Sanicompact is 120V, 15 Amp. The system should be connected to a Ground Fault Circuit Interrupter circuit. - Price: \$869.95 - Code: SCE

Drain Brass Pop-up - Chrome Plated - Price: \$19.95 - Code: 16924

<http://a1ly.com/html/264.html>

SaniBest Round Front - * Includes white round front toilet bowl, toilet tank & macerating unit * Does NOT include toilet seat * Pump Dimensions: H12" x W21" x D8" * Motor: Induction Motor (no carbon brushes or gears), tested over 30,000 cycles. 3600 rpm. * Electrical supply: 110-115V; 60Hz; 9amps * Discharge: Horizontally to 150 ft, Pumps vertically to 16 ft * Gravity Fall on Horizontal installations: 1/4" per ft * Discharge Pipe Diameter: 3/4" * Construction Materials: Polypropylene, C.R.P., stainless steel, Neoprene * Max. temp. 104°F * Normal Running Time: 10-20 secs subject to installation pipe run * Water per Flush: 1.6 US gal, Volume 10.88 gal/m * Designed to function with Toilet & Hand-basin &, Shower or Bathtub & Washing Machine (must drain into sink first) * Accessory: Extension kit Model# Exten-4000 allows hiding macerator behind wall. * While most the Saniflow products are basically shredders, the Sanibest incorporates an actual grinder system. The Sanibest is ideal for situations where you do not control the use of it; i.e. rental unit, offices, warehouses, etc. The Sanibest is designed to deal with sanitary articles that may have been flushed down the toilet by accident. Use it to install a complete bathroom up to 16 feet below the sewer line, or even up to 150 feet away from a soil stack. * Installation is simple, there are just four connections. The macerating/pump is connected to the spigot of a horizontal outlet toilet. The toilet tank is connected to the water supply. The macerating/pump is connected to the small diameter discharge pipe work. The macerating/pump is connected to the electrical supply. * In addition to the toilet waste, Sanibest will also discharge gray wastewater from a variety of other sanitary fixtures, such as: a hand basin, a bath, a bidet, a urinal and even a clothes washer (Note: washing machine must drain to a laundry sink or tub first). When adding a bathtub or shower a raised base will have to be constructed to allow for the installation of a P-trap and some gravity flow towards the pump unit. - Price: \$1005.95 - Code: SBR

Down Shift Aluminum Tank Lever - When it's time to flush... Downshift with this "American made" aluminum shifter. Features a 4-Speed shift pattern on the top of ball. This quality aluminum shifter looks just like the one in your dream car, except it flushes almost every type of toilet! High performance, sports car, and racing fans will all have something to say about this fun yet very functional gift. Made of solid aluminum with a brass rod that mounts inside the tank. This lever is also very useful for those who find it difficult to operate the smaller, more traditional handles since use requires only one finger or your wrist, perfect for those who require some assistance or other Home Care needs. The Downshift Flusher is MADE IN THE USA and comes with a One Year Warranty. Easy installation. Complete kit, includes all necessary hardware to replace that boring stock unit - Price: \$36.95 - Code: DS-1

Clear Shower Mirror - The Shower ClearMirror is a patented, low-voltage, fog free shower mirror. With our engineers and those at Underwriters Laboratories, Inc. we have developed the best quality and electrically safe design. This version is ideal for shaving right in the shower. Operating at a standard of 24-volts it is also available in 12-volts for RV applications. The standard Shower ClearMirror is a high quality 1/4" pencil-polished edge glass mirror with a 24-volt ClearMirror adhered to the back. A template is provided and used to install the ceramic tile (slightly larger than the ClearMirror. The Shower ClearMirror is then attached to the low-voltage supply lines and secured into place with a bead of caulk. To power the ClearMirror a UL Listed plug-in transformer is provided which is simply plugged into a switched outlet, i.e., below the vanity sink, in the attic space or in an adjoining closet. - Price: \$289.95 - Code: CSM1818
